

STRUCTURED SIMPLICITY

WITH LUNDHS REAL STONE

A harmonious fusion of natural materials, contemporary architecture and minimalist design, this modern Nordic kitchen is an exquisite example of how to achieve the perfect balance between elegant form and function. Complemented by dark cabinetry, brass accents and wood-grained surfaces, the Lundhs Real Stone worktops offer a sense of curated structure, whilst delivering an unapologetically Scandinavian aesthetic.

Taking centre stage, the large island creates a distinctive focal point with a waterfall Lundhs Emerald worktop. Characterised by a lightly structured finish, making the enticing dark material appear even more organic, the 100% natural Norwegian stone surfaces combine clean, graceful design with effortless modernism, resulting in an inviting open-plan setting.

The ideal surface for kitchen worktops, Lundhs Real Stone boasts high heat, water, scratch, UV and stain resistance, meaning you can place hot pans directly on the surface without any fears of damage. Made from one of the most unique and strongest materials in the world, Larvikite, Lundhs Emerald is a truly one of a kind piece.

Crafted by nature 300 million years ago and quarried on the southern coast of Norway in a town called Larvik, there is no other place in the world where you can find the same type of natural stone. Offering each customer their own unique piece of Norway, every Lundhs Real Stone worktop is delivered with a certificate of authenticity, stating the origin of the stone.

Lundhs Emerald worktop, priced from £680 inc VAT / m²
